<b>1</b>	<b>Introduction</b> .....	19
1.1	Visualization in Medicine as a Specialty of Scientific Visualization .	20
1.2	Computerized Medical Imaging .....	22
1.3	2D and 3D Visualizations .....	27
1.4	Further Information .....	28
1.5	Organization .....	29
 <b>I Acquisition, Analysis, and Interpretation of Medical Volume Data</b>		
<b>2</b>	<b>Acquisition of Medical Image Data</b> .....	35
2.1	Introduction .....	35
2.2	Medical Image Data .....	36
2.3	Data Artifacts and Signal Processing .....	40
2.3.1	Sampling Theorem .....	40
2.3.2	Undersampling and Aliasing .....	42
2.3.3	Interpolation Artifacts .....	44
2.4	X-Ray Imaging .....	46
2.4.1	Angiography .....	48
2.4.2	Rotational X-Ray .....	49
2.4.3	Discussion .....	51
2.4.4	Current and Future Developments of X-Ray Imaging .....	52
2.5	Computed Tomography .....	52
2.5.1	Computed Tomography Compared to X-Ray Imaging .....	53
2.5.2	Principle of CT Data Generation .....	54
2.5.3	Standardization with Hounsfield Units .....	55
2.5.4	Parameters of CT Scanning .....	56
2.5.5	Artifacts in CT Image Acquisition .....	59
2.5.6	Current and Future Developments of CT Scanners .....	62
2.5.7	Discussion .....	66
2.6	Magnetic Resonance Imaging .....	66
2.6.1	Principles of MRI .....	66

2.6.2	Parameters of MR Scanning	70
2.6.3	Artifacts in MRI Data	74
2.6.4	Functional MRI	74
2.6.5	Ultra-High-Field MRI	77
2.6.6	Diffusion Tensor Imaging	78
2.6.7	Discussion	79
2.7	Ultrasound	80
2.8	Imaging in Nuclear Medicine	84
2.8.1	Positron Emission Tomography - PET	84
2.8.2	Hybrid PET/CT and PET/MRI Scanners	87
2.8.3	Single Photon Emission Computed Tomography - SPECT	88
2.9	Intraoperative Imaging	89
2.9.1	CT- and MR-Guided Interventions	90
2.9.2	Fluoroscopy	92
2.9.3	Intraoperative Ultrasound	92
2.9.4	Intraoperative MRI	94
2.10	Summary	95
<b>3</b>	<b>An Introduction to Medical Visualization in Clinical Practice</b>	<b>99</b>
3.1	Introduction	99
3.2	Diagnostic Accuracy	100
3.3	Visual Perception	104
3.3.1	Gray Value Perception	104
3.3.1.1	Just Noticeable Differences	105
3.3.1.2	Spatial Resolution	106
3.3.1.3	Contrast Perception	107
3.3.1.4	Monitors for Radiologic Diagnosis	108
3.3.2	Color Spaces, Color Scales and Color Perception	109
3.3.3	Visual Perception and Attention in the Diagnosis of Medical Volume Data	113
3.4	Storage of Medical Image Data	114
3.4.1	Scope of DICOM	115
3.4.2	Structure of DICOM Data	116
3.5	Conventional Film-Based Diagnosis	118
3.5.1	Cooperation of Radiologists and Radiology Technicians	119
3.5.2	Tasks in Conventional Film-Based Diagnosis	119
3.6	Soft-Copy Reading	120
3.6.1	Digital Radiology Departments	120
3.6.2	Tasks in Soft-Copy Reading	123
3.6.3	Digital Hanging Protocol	127
3.6.4	Computer-Aided Detection	128
3.6.4.1	CAD in Mammography Diagnosis	131
3.6.4.2	CAD in Polyp Detection	132
3.6.5	Diagnosis with 3D Visualizations	133
3.6.5.1	Multiplanar Reformatting	134

3.6.5.2	Maximum Intensity Projection	135
3.6.5.3	Surface Shaded Display	135
3.6.5.4	Volume Rendering	136
3.6.5.5	Virtual Endoscopy	137
3.6.6	Guidelines for Soft-Copy Reading	137
3.6.6.1	Interaction with Pointing Device and Function Keys	138
3.6.6.2	Dedicated Support for Multi-Monitor Solutions	138
3.6.6.3	Dedicated Support for Report Generation	139
3.7	Medical Visualization in Nuclear Medicine	139
3.8	Medical Image Data in Radiation Treatment Planning	140
3.8.1	Conformant and Intensity-Modulated Radiation Treatment	145
3.8.2	Brachytherapy	146
3.9	Medical Team Meetings	147
3.10	Concluding Remarks	149
<b>4</b>	<b>Image Analysis for Medical Visualization</b>	<b>151</b>
4.1	Introduction	151
4.2	Preprocessing and Filtering	153
4.2.1	ROI Selection	153
4.2.2	Resampling	154
4.2.3	Histogram and Histogram Transformation	155
4.2.4	General Noise Reduction Techniques	156
4.2.5	Inhomogeneity Correction	164
4.2.6	Gradient Filtering	165
4.3	An Introduction to Image Segmentation	166
4.3.1	Requirements	167
4.3.2	Manual Segmentation	168
4.3.3	Threshold-Based Segmentation	168
4.3.3.1	Threshold Selection	169
4.3.3.2	Probabilistic Models	169
4.3.3.3	Multidimensional Thresholding	170
4.3.3.4	Connected Component Analysis	171
4.3.4	Region Growing	171
4.3.5	Watershed Segmentation	173
4.4	Graph-Based Segmentation Techniques	176
4.4.1	Livewire Segmentation	177
4.4.2	Contour-Based Segmentation with Variational Interpolation	181
4.4.3	Graph Cuts	183
4.4.4	Random Walker Segmentation	184
4.5	Advanced and Model-Based Segmentation Methods	185
4.5.1	Active Contour Models	186
4.5.2	Level Sets and Fast Marching Methods	188
4.5.3	Statistical Shape Models	190
4.5.4	Active Appearance Models	195

4.5.5	Incorporating Model Assumptions in Region Growing Segmentation	196
4.5.6	Application: Tumor Segmentation	196
4.5.7	Verification and Representation of Segmentation Results	200
4.6	Interaction for Segmentation	203
4.6.1	General Techniques for Correcting Pre-Segmentations	204
4.6.2	Mesh-Based Correction of Segmentation Results	204
4.6.3	Interactive Morphological Image Processing	208
4.6.4	Interaction Techniques for Semi-Automatic Segmentation	210
4.7	Validation of Segmentation Methods	212
4.7.1	Phantom Studies versus Clinical Data	212
4.7.2	Validation Metrics	214
4.7.3	Validation with Public Databases	215
4.8	Registration and Fusion of Medical Image Data	215
4.8.1	Transformation	217
4.8.2	Fitting	219
4.8.3	Model-Based Registration	221
4.8.4	Efficient Registration	222
4.8.5	Visualization	223
4.9	Summary	225
<b>5</b>	<b>Human-Computer Interaction for Medical Visualization</b>	<b>229</b>
5.1	Introduction	229
5.2	User and Task Analysis	231
5.2.1	Task Analysis Methods	232
5.2.2	What has to be analyzed?	233
5.2.3	Representations of Task Analysis	234
5.2.3.1	Workflow Analysis	235
5.2.3.2	Scenario-Based Design	237
5.2.4	Understanding the User	243
5.2.5	Case Study: Task Analysis for Medical Team Meetings	245
5.3	Metaphors	245
5.4	Prototyping	247
5.5	User Interface Principles and User Experience	249
5.5.1	General User Interface Principles	251
5.5.2	User Interface Principles for Medical Applications	252
5.5.3	User Experience	253
5.6	3D Interaction Techniques	254
5.6.1	Selection Tasks	254
5.6.2	3D Rotation	255
5.6.3	Object Placement	258
5.6.4	Navigation	260
5.7	Input Devices	261
5.7.1	6 DOF Input Devices	264
5.7.2	Tactile Input Devices	266

5.8	HCI in the Operating Room .....	268
5.9	Mobile Computing .....	272
5.10	Evaluation .....	278
5.10.1	Formative and Summative Evaluations .....	278
5.10.2	Inspection-Based and Empirical Evaluations .....	280
5.10.3	Evaluation of Interactive Segmentation Techniques .....	280
5.10.4	Post Market Clinical Follow Up .....	281
5.11	Conclusion .....	281

## II Visualization and Exploration of Medical Volume Data

<b>6</b>	<b>Surface Rendering .....</b>	<b>287</b>
6.1	Introduction .....	287
6.2	Reconstruction of Surfaces from Contours .....	288
6.2.1	Topological Problems .....	288
6.2.2	Neighborhood Relations in Surface Meshes .....	290
6.2.3	Representation of Surface Meshes .....	291
6.3	Marching Cubes .....	292
6.3.1	Marching Squares .....	293
6.3.2	Basic Algorithm .....	294
6.3.3	Discussion .....	297
6.3.4	Advanced Surface Extraction Methods .....	300
6.3.5	Hardware-Accelerated Isosurface Extraction .....	301
6.4	Surface Rendering of Unsegmented Volume Data .....	302
6.4.1	Preprocessing Volume Data for Visualization .....	302
6.4.2	Selection of Isovalues .....	304
6.4.3	Multiple and Nested Isosurfaces .....	305
6.4.4	Isosurface Topology Simplification .....	308
6.5	Surface Rendering of Segmented Volume Data .....	309
6.5.1	Preprocessing .....	309
6.5.2	Basic Mesh Smoothing .....	313
6.5.3	Interactive Real-Time Mesh Smoothing .....	317
6.5.4	Evaluation of Smoothing Approaches .....	320
6.6	Advanced Mesh Smoothing .....	321
6.6.1	Constrained Mesh Smoothing .....	322
6.6.2	Context-Aware Smoothing .....	323
6.6.3	Extracting Surfaces From Label Volumes .....	325
6.6.4	Evaluation of Advanced Mesh Smoothing .....	327
6.7	Mesh Simplification and Web-Based Surface Rendering .....	327
6.7.1	Mesh Simplification .....	327
6.7.2	Web-Based Surgical Planning .....	329
6.7.3	Web-Based Medical Education .....	330
6.8	Concluding Remarks .....	330

<b>7</b>	<b>Direct Volume Visualization</b>	335
7.1	Theoretical Models	336
7.1.1	Emission	336
7.1.2	Absorption	338
7.1.3	Volume Rendering Equation	338
7.2	The Volume Rendering Pipeline	340
7.2.1	Pre-Classified Volume Rendering Pipeline	342
7.3	Compositing	343
7.3.1	Compositing Variations: Pseudo X-Ray, MIP, CVP and MIDA	345
7.3.2	Thin Slab Volume Rendering	348
7.3.3	Pre-Integrated Volume Rendering	351
7.4	Volume Raycasting	352
7.5	Efficient Volume Rendering	353
7.6	Direct Volume Rendering on the GPU	354
7.7	Summary	356
<b>8</b>	<b>Advanced Direct Volume Visualization</b>	359
8.1	Introduction	359
8.2	Volumetric Illumination	360
8.2.1	Volumetric Illumination Model	362
8.2.2	Algorithm Classification	364
8.2.3	Local Region-Based Techniques	368
8.2.4	Slice-Based Techniques	373
8.2.5	Light Space-Based Techniques	377
8.2.6	Lattice-Based Techniques	382
8.2.7	Basis Function-Based Techniques	385
8.2.8	Raytracing-Based Techniques	388
8.2.9	Perceptual Impact	389
8.2.10	Technical Considerations	390
8.3	Artificial Depth Enhancements	391
8.3.1	Color Coding	392
8.3.2	Halos	394
8.3.3	Depth of Field	396
8.4	Concluding Remarks	398
<b>9</b>	<b>Volume Interaction</b>	401
9.1	Introduction	401
9.2	One-Dimensional Transfer Functions	403
9.2.1	Unassisted Techniques	405
9.2.2	Data-Driven Transfer Functions	407
9.2.2.1	Clustering	407
9.2.2.2	Boundary Emphasis with Transfer Functions	410
9.2.2.3	Reference Transfer Functions	411
9.2.2.4	Visibility-Driven Transfer Functions	412

9.2.2.5	Shape-Based Transfer Functions	414
9.2.2.6	Statistics-Based Transfer Functions	414
9.2.3	Image-Driven Transfer Functions	415
9.2.3.1	Search-Based Transfer Function Specification	415
9.2.3.2	Specification with Component Functions	416
9.2.3.3	Transfer Function Specification Based on Local Histograms	416
9.2.3.4	Layer Concepts for Transfer Function Design	417
9.3	Multidimensional Transfer Functions	418
9.3.1	Histograms for 2D Transfer Functions	419
9.3.2	2D Component Functions	421
9.3.3	Representation of 2D Transfer Functions	422
9.3.4	Size-Based Transfer Functions	422
9.4	Gradient-Based and LH-Based Transfer Functions	424
9.4.1	Gradient-Based Transfer Functions	425
9.4.2	Gradient Estimation and Storage	425
9.4.3	User Interfaces for Gradient-Based Transfer Functions	426
9.4.3.1	Arcs in Gradient Magnitude/Intensity Histograms	426
9.4.3.2	High-Level User Interfaces for Gradient-Based Visualizations	428
9.4.4	2D Transfer Functions based on LH Histograms	430
9.5	Local and Distance-Based Transfer Functions	434
9.5.1	Distance-Based Transfer Functions	435
9.5.2	Local Transfer Functions	438
9.6	Advanced Picking	440
9.6.1	Contextual Picking	440
9.6.2	Visibility-Based Picking	442
9.7	Clipping	442
9.8	Virtual Resection	445
9.8.1	Virtual Resections by Drawing on Slices	446
9.8.2	Virtual Resection with a Deformable Cutting Plane	446
9.8.2.1	Defining Cutting Plane Boundaries	447
9.8.2.2	Generation of the Initial Cutting Plane	448
9.8.2.3	Modification of Virtual Resections	450
9.8.2.4	Evaluation	453
9.9	Cutting Medical Volume Data	453
9.9.1	High-Quality Representation of Cut Surfaces	454
9.9.2	Virtual Resection and Surgery Simulation	455
9.10	Summary	455
<b>10</b>	<b>Labeling and Measurements in Medical Visualization</b>	<b>459</b>
10.1	Introduction	459
10.2	General Design Issues	460
10.3	Interactive Measurement of Distances and Volumes	462
10.3.1	Interactive Distance Measurement	462

10.3.2	Estimation of Quantitative Values	464
10.4	Automatic Distance Measures	467
10.4.1	Bounding Volumes and Spatial Trees for Distance Computation	468
10.4.2	Efficient and Flexible Distance Computation	471
10.4.3	Clinical Examples	474
10.4.4	Measuring the Extents of Objects	474
10.5	Angular Measurements	477
10.5.1	Measurement of Angles Between Elongated Objects	477
10.5.2	Medical Applications	479
10.6	Measurements in Virtual Reality	480
10.7	Labeling 2D and 3D Medical Visualizations	482
10.7.1	Internal Labeling of 3D Medical Surface Models	483
10.7.2	External Labeling	485
10.7.3	Labeling Slice-Based Visualizations	488
10.8	Summary	490

### III Advanced Medical Visualization Techniques

<b>11</b>	<b>Visualization of Vascular Structures</b>	497
11.1	Introduction	497
11.2	Enhancing Vascular Structures	498
11.2.1	Emphasis of Elongated Structures	499
11.2.2	Bone Removal	501
11.3	Projection-Based Visualization	501
11.3.1	Maximum Intensity and Closest Vessel Projection	502
11.3.2	Maximum Intensity Difference Accumulation	503
11.3.3	Curved Planar Reformation	504
11.4	Vessel Analysis	510
11.4.1	Vessel Segmentation	510
11.4.2	Skeletonization and Graph Analysis	513
11.4.3	Diameter Estimation	517
11.5	Model-Based Surface Visualization	519
11.5.1	Reconstruction with Cylinders and Truncated Cones	520
11.5.1.1	Quality Aspects of Vascular Reconstructions	520
11.5.1.2	Efficient Realization of Vascular Reconstructions	521
11.5.2	Visualization with Parametric and Subdivision Surfaces	524
11.5.3	Implicit Reconstruction of Vascular Trees	525
11.5.3.1	Introduction	526
11.5.3.2	Convolution Surfaces	526
11.5.3.3	Blending and Bulging	528
11.5.3.4	Filter Modification	529
11.6	Model-Free Surface Visualization	532
11.6.1	Smoothing Surface Visualizations	533
11.6.2	Visualization with MPU Implicits	533

11.6.3	Implicit Reconstruction with Sweeping	537
11.7	Vessel Visualization for Diagnosis	540
11.7.1	Diagnosis of Cerebral Aneurysms and Arterio-Venous Malformations	543
11.7.1.1	Medical Background	543
11.7.1.2	Focus-and-Context Rendering	544
11.7.2	Diagnosis of the Coronary Heart Disease	547
11.7.2.1	Medical Background	547
11.7.2.2	Designing Local Transfer Functions	549
11.7.2.3	Multimodal Vessel Visualization for Disease Understanding	551
11.7.3	Multiple Coordinated Views	551
11.8	Summary	552
<b>12</b>	<b>Illustrative Medical Visualization</b>	<b>555</b>
12.1	Introduction	555
12.2	Medical Applications	557
12.3	Curvature Approximation	559
12.3.1	Curvature-Related Measures	560
12.3.2	Curvature Estimation for Illustrative Visualization	562
12.4	An Introduction to Feature Lines	563
12.4.1	An Overview of Feature Lines	564
12.4.2	General Aspects of Feature Line Rendering	565
12.5	Geometry-Dependent Feature Lines	569
12.5.1	Silhouette Generation	569
12.5.1.1	Silhouette Definition	569
12.5.1.2	Silhouette Extraction in Volume Data	570
12.5.1.3	Silhouette Generation	571
12.5.2	Crease Lines	574
12.5.3	Ridge and Valley Lines	576
12.5.4	Suggestive Contours	578
12.5.5	Apparent Ridges	581
12.5.6	Streamline-Based Illustrative Rendering	582
12.6	Light-Dependent Feature Lines	583
12.6.1	Laplacian Lines	584
12.6.2	Photoc Extremum Lines	586
12.6.3	Highlight Lines	589
12.6.4	Discussion	590
12.7	Stippling	591
12.7.1	Essential Parameters of Stippling	592
12.7.2	Frame-Coherent Stippling	594
12.8	Hatching	597
12.8.1	Curvature-Guided Hatching	598
12.8.2	Model-Based Hatching of Muscles and Vascular Structures	600
12.8.3	Combination of Curvature and Preferential Direction	603

12.8.4	Hatching Volume Models	603
12.9	Illustrative Shading	605
12.9.1	Shading in Medical Textbooks	606
12.9.2	Realization of the Extended Shading	607
12.9.3	Illustrative Visualization of Vascular Trees	610
12.10	Smart Visibility	613
12.10.1	Cutaways	615
12.10.1.1	Deformations	615
12.10.1.2	Volumetric Lenses	616
12.10.2	Ghosted Views	619
12.11	Conclusion	621
<b>13</b>	<b>Virtual Endoscopy</b>	625
13.1	Introduction	625
13.2	Medical and Technical Background	627
13.3	Preprocessing	630
13.3.1	Preprocessing Workflow	630
13.3.2	Path Planning	630
13.3.2.1	Keyframing	631
13.3.2.2	Robot Motion Planning	631
13.3.2.3	Skeletonization for Path Planning	632
13.4	Rendering for Virtual Endoscopy	633
13.4.1	Indirect Volume Rendering	634
13.4.2	Direct Volume Rendering	634
13.4.3	Hybrid Rendering	636
13.4.4	Advanced Rendering	637
13.4.5	Geometry Culling	638
13.5	User Interfaces for Virtual Endoscopy	641
13.5.1	Camera Control and Navigation	641
13.5.2	Views for Interactive Virtual Endoscopy	643
13.5.3	Graphical User Interface	644
13.5.4	Input Devices	645
13.6	Applications	645
13.6.1	Virtual Colonoscopy	646
13.6.2	Virtual Bronchoscopy	649
13.6.3	Virtual Angioscopy	652
13.6.4	Virtual Endoscopy for Minimally-Invasive Neurosurgery	655
13.7	Concluding Remarks	659
<b>14</b>	<b>Projections and Reformations</b>	661
14.1	Introduction	661
14.2	Overview	662
14.3	Anatomical Unfolding	663
14.3.1	Cardiac Bull's Eye Plots	663
14.3.2	Brain Cortex Flattening	664

14.3.3	Colon Unfolding	666
14.3.4	Multiply Branched Vessel Unfolding	669
14.4	Anatomical Planar Reformation / Projection	670
14.4.1	Tubular Straightening	671
14.4.2	Articulated Planar Reformation	673
14.5	Map Projections	674
14.5.1	Tumor Maps	674
14.5.2	Liver Resection Surface Maps	676
14.5.3	Colonoscopy Maps	678
14.5.4	Aneurysm Maps	678
14.6	Conclusion	680

#### **IV Visualization of High-Dimensional Medical Image Data**

<b>15</b>	<b>Visualization of Brain Connectivity</b>	683
15.1	Introduction	683
15.2	Acquisition of Connectivity Data	685
15.2.1	EEG and MEG	685
15.2.2	Magnetic Resonance Imaging	687
15.2.3	Diffusion MRI	688
15.2.4	Functional MRI	690
15.3	Visualization of Structural Connectivity	691
15.3.1	Scalar Reduction	692
15.3.2	Glyphs	699
15.3.2.1	DTI Glyphs	699
15.3.2.2	HARDI Glyphs	701
15.3.2.3	Visualization of Glyphs	702
15.3.3	Global Multifield	705
15.3.3.1	Streamlines as Neural Pathways: Computation and Visualization	707
15.3.3.2	Hyperstreamlines and Stream Surfaces	717
15.3.3.3	Exploration of Fiber Tracts through Clustering	719
15.3.3.4	Probabilistic Tractography	728
15.4	Visualization of Connectivity Matrices	730
15.4.1	Non-Spatial Methods	730
15.4.2	Spatial Methods	735
15.5	Summary	738
<b>16</b>	<b>Visual Exploration and Analysis of Perfusion Data</b>	741
16.1	Introduction	741
16.2	Medical Imaging	742
16.2.1	Cerebral Perfusion	746
16.2.2	Tumor Perfusion	746
16.2.3	Cardiac Perfusion	747
16.3	Data Processing and Data Analysis	748

16.3.1	Motion Correction	749
16.3.2	Calibration of Signal Intensities	750
16.3.3	Segmentation	752
16.3.4	Noise Reduction	753
16.3.5	Pharmacokinetic Modeling	754
16.3.6	Classification of Perfusion Data and Computer-Aided Detection	756
16.4	Visual Exploration of Perfusion Data	757
16.4.1	Basic Visualization Techniques	757
16.4.2	Visualization of Multiple Perfusion Parameters	759
16.4.3	Integrating Dynamic Information and Morphology	763
16.4.4	Probing and Annotating of Perfusion Data	764
16.5	Visual Analysis of Perfusion Data	765
16.5.1	Visual Analytics	765
16.5.2	Application to Perfusion Data	767
16.6	Case Study: Cerebral Perfusion	770
16.6.1	Medical Imaging and Preprocessing	770
16.6.2	Diagnosis of Ischemic Stroke	771
16.6.3	Brain Tumor Diagnosis	773
16.7	Case Study: Breast Tumor Perfusion	775
16.7.1	Medical Imaging and Preprocessing	777
16.7.2	Visual Exploration of DCE-MRI Mammography Data	777
16.7.3	Visual Analysis of DCE-MRI Mammography Data	779
16.7.4	Assessing Heterogeneity of Breast Tumors	783
